# SAFETY DATA SHEET

Date of issue : 5 February 2019

Version : 4

## Section 1. Identification

Product code	: 700001/1L
Product name	: FLOOD PENETROL ALUMINIUM
Product type	: Liquid.
Recommended use and rest	<u>rictions</u>
Use of the substance/ mixture	: Coating.
Uses advised against	: Not applicable.
Supplier's details	: PPG INDUSTRIES NEW ZEALAND LTD 5 MONAHAN ROAD, MT WELLINGTON, AUCKLAND www.ppgnz.co.nz
	Telephone Numbers: 09 573 1620, 0800 659378 021 940 920 (24 Hours)
Emergency telephone number (with hours of operation)	: New Zealand 0800 000 096 / Australia 1800 883 254 For international shipping emergencies: 1-412-391-1618
e-mail address of person responsible for this SDS	: ehsnz@ppg.com

## Section 2. Hazards identification

HSNO Classification	: 3.1 - FLAMMABLE LIQUIDS - Category C
	6.3 - SKIN IRRITATION - Category B
	6.5 - SENSITIZATION - Category B (Skin)
	6.7 - CARCINOGENICITY - Category B
	9.1 - AQUATIC ECOTOXICITY - Category B
This material is classified as ha	zardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard)

Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001. This material is classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

GHS label elements	
Signal word	: Warning
Hazard statements	<ul> <li>Fammable liquid and vapour.</li> <li>Causes mild skin irritation.</li> <li>May cause an allergic skin reaction.</li> <li>Suspected of causing cancer.</li> <li>Toxic to aquatic life with long lasting effects.</li> </ul>
Processitionary statements	

**Precautionary statements** 

### Section 2. Hazards identification

Prevention	: Detain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves. Wear eye or face protection. Keep away from ignition sources such as heat/sparks/open flame No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Avoid release to the environment. Keep out of reach of children. Avoid breathing vapour. Contaminated work clothing should not be allowed out of the workplace. If medical advice is needed: Have product container or label at hand.
Response	: Collect spillage. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water [or shower]. Wash with plenty of soap and water. Wash contaminated clothing before reuse. IF exposed or concerned: Get medical advice/attention.
Storage	: Store locked up. Store in a well-ventilated place. Keep cool.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Symbol	
Other hazards which do not	: Prolonged or repeated contact may dry skin and cause irritation.

result in classification

### Section 3. Composition/information on ingredients

Substance/mixture : Mixture CAS number/other identifiers		
Product code : 700001/1L		
1100001/1E	F	F
Hazardous ingredients	%	CAS number
Maphtha (petroleum), hydrotreated heavy	30 - 60	64742-48-9
Naphtha (petroleum), hydrodesulfurized heavy	1 - <10	64742-82-1
2-butanone oxime	<1	96-29-7

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment or have an OEL and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

: Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.
<ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.</li> </ul>
: Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.

### Section 4. First aid measures

: If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.
ffects, acute and delayed
<u>ets</u>
: No known significant effects or critical hazards.
: No known significant effects or critical hazards.
: Causes mild skin irritation. Defatting to the skin. May cause an allergic skin reaction.
: No known significant effects or critical hazards.
i <u>toms</u>
: Adverse symptoms may include the following: pain or irritation watering redness
: No specific data.
: Adverse symptoms may include the following: irritation redness dryness cracking
: No specific data.
lical attention and special treatment needed, if necessary
: Not available.
<ul> <li>No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>
: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

## Section 5. Firefighting measures

Extinguishing media		
Suitable	: Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.	
Not suitable	: Do not use water jet.	
Specific hazards arising from the chemical	: Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to seve may create fire or explosion hazard. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.	r
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon oxides metal oxide/oxides	
Hazchem code	: Not available.	
Special precautions for fire- fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.	

Product code 700001/1L

### Product name FLOOD PENETROL ALUMINIUM

### Section 5. Firefighting measures

Special protective	1
equipment for fire-fighters	

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
Methods and material for con	tai	nment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

Precautions for safe : handling	Fut on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.
---------------------------------	--

## Section 7. Handling and storage

Conditions for safe storage, including any incompatibilities	: Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
--	---

## Section 8. Exposure controls/personal protection

#### **Control parameters**

Ingredient name			Exposure limits	
None.				
Recommended monitoring procedures	:		hay be required to determine the effective sures and/or the necessity to use respirate uld be made to appropriate monitoring ance documents for methods for the	
Appropriate engineering controls	:	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.		
Environmental exposure controls	:	they comply with the requirements of e	cess equipment should be checked to en environmental protection legislation. In so eering modifications to the process equip to acceptable levels.	ome
Individual protection measure	S			
Hygiene measures	:	eating, smoking and using the lavatory Appropriate techniques should be used Contaminated work clothing should no	d to remove potentially contaminated clot of be allowed out of the workplace. Wash Ensure that eyewash stations and safety	thing.
Respiratory protection	:	hazards of the product and the safe we workers are exposed to concentrations appropriate, certified respirators. Use	a known or anticipated exposure levels, the orking limits of the selected respirator. If a above the exposure limit, they must use a properly fitted, air-purifying or air-fed standard if a risk assessment indicates the	
Hand protection	:	be worn at all times when handling che this is necessary. Considering the par- check during use that the gloves are s should be noted that the time to break for different glove manufacturers. In the	complying with an approved standard sh emical products if a risk assessment indic ameters specified by the glove manufactu till retaining their protective properties. It through for any glove material may be dif he case of mixtures, consisting of several gloves cannot be accurately estimated.	cates urer, ferent
			New Zealand Page	e: 5/11

## Section 8. Exposure controls/personal protection

Gloves	: butyl rubber
Eye protection	: Safety glasses with side shields.
Skin protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

## Section 9. Physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid.
Colour	: Silvery.
Odour	: Not available.
Odour threshold	: Not available.
рН	: Not available.
Melting point	: Not available.
Boiling point	: 93°C (199.4°F)
Flash point	: Closed cup: 46°C (114.8°F)
Material supports combustion.	: Yes.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Vapour pressure	: Not available.
Relative density	: 0.9
Bulk Density (g/cm³)	: 0.9
Solubility	: Insoluble in the following materials: cold water.
Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Viscosity	: Kinematic (40°C (104°F)): >0.21 cm²/s (>21 cSt)

## Section 10. Stability and reactivity

Stability	: The product may not be stable under certain conditions of storage or use.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials strong acids strong alkalis
Hazardous decomposition products	<ul> <li>Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides</li> </ul>

Product code 700001/1L

### Product name FLOOD PENETROL ALUMINIUM

### Section 10. Stability and reactivity

Hazardous polymerisation

: Under normal conditions of storage and use, hazardous polymerisation will not occur.

### Section 11. Toxicological information

### Information on likely routes of exposure

Inhalation	known significant effects or critical hazards.	
Ingestion	known significant effects or critical hazards.	
Skin contact	uses mild skin irritation. Defatting to the skin. May cause an allergic sk	in reaction.
Eye contact	known significant effects or critical hazards.	
Symptoms related to the phy	hemical and toxicological characteristics	
Inhalation	specific data.	
Ingestion	specific data.	
Skin contact	verse symptoms may include the following: ation ness ness cking	
Eye contact	verse symptoms may include the following: n or irritation ering ness	

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure	
Naphtha (petroleum), hydrotreated heavy	LD50 Oral	Rat	>6 g/kg	-	
2-butanone oxime	LD50 Oral	Rat	930 mg/kg	-	
<b>Conclusion/Summary</b>	: There are no data avail	able on the mixture it	self.		
Irritation/Corrosion					
Conclusion/Summary					
Skin	: There are no data avail	able on the mixture it	self.		
Eyes	: There are no data avail	able on the mixture it	self.		
Respiratory	: There are no data avail	able on the mixture it	self.		
Sensitisation					
Conclusion/Summary					
Skin	: There are no data available on the mixture itself.				
Respiratory	: There are no data available on the mixture itself.				
Potential chronic health eff	ects				
General	: Prolonged or repeated or dermatitis.	contact can defat the	skin and lead to in	itation, cracking and/	
Skin contact	: Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.				
Carcinogenicity	: Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.				
Mutagenicity	: No known significant ef	fects or critical hazar	ds.		
Teratogenicity	: No known significant ef	fects or critical hazar	ds.		

New Zealand Page: 7/11

### Section 11. Toxicological information

Developmental effects	: No known significant effects or critical hazards.
Fertility effects	: No known significant effects or critical hazards.
Chronic toxicity	
Not available.	
<b>Carcinogenicity</b>	
<b>Conclusion/Summary</b>	: There are no data available on the mixture itself.
<u>Mutagenicity</u>	
<b>Conclusion/Summary</b>	: There are no data available on the mixture itself.
<b>Teratogenicity</b>	
Conclusion/Summary	: There are no data available on the mixture itself.
Reproductive toxicity	
Conclusion/Summary	: There are no data available on the mixture itself.
Specific target organ toxic	ity

Name		Route of exposure	Target organs
₽-butanone oxime	Category B	Skin	Not determined Not determined Not determined

#### Aspiration hazard

Name	
Maphtha (petroleum), hydrotreated heavy Naphtha (petroleum), hydrodesulfurized heavy	

Numerical measures of toxicity

Acute toxicity estimates

Not available.

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains 2-butanone oxime, cobalt bis(2-ethylhexanoate). May produce an allergic reaction.

Product code 700001/1L

Date of issue 5 February 2019 Version 4

#### Product name FLOOD PENETROL ALUMINIUM

### Section 12. Ecological information

Ecotoxicity

: This material is toxic to aquatic life with long lasting effects.

#### Aquatic and terrestrial toxicity

Not available.

#### Persistence/degradability

Not available.

#### Bioaccumulative potential

Product/ingredient name	LogPow	BCF	Potential
2-butanone oxime	0.63	5.01	low

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Do not allow to enter drains or watercourses.

### Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Not suitable:

: Do not allow to enter drains or watercourses.

The classification of the product may meet the criteria for a hazardous waste. Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

### 14. Transport information

Marine pollutant substances	Not applicable.	Not applicable.	Not applicable.	Not applicable.		

NZ	: None identified.
ADG	: None identified.
Hazchem code	: •3Y
IMDG	: None identified.
IATA	: None identified.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

## Section 15. Regulatory information

New Zealand Inventory of Chemicals (NZIoC)	: All components are listed or exempted.	
HSNO Approval Number	: HSR002669 Flammable, Toxic [6.7]	
Emergency Management Regulations	: Level 1: Labelling required when 1L is present in a workplace.	
	Level 2: MSDS required when any amount is present in a workplace. At least 2 x 4.5 kg powder fire extinguishers required when 500L is present in a workplace.	
	Level 3: Emergency Response Plans and Secondary Containment required when 1000L is stored.	
	Flammable Signage required when 1000L is present in a workplace.	
	Ecotoxic Signage required when 1000L is present in a workplace.	
Classes 1 to 5 Control Regulations	<ul> <li>Hazardous Atmosphere Zones required for quantities greater than: 100L (closed), 25L (decanting), 5L (open occasionally), 1L (open continuously). Hazardous Substances Location Certificate required for quantities greater than: 1500L (containers up to 5L), 500L (containers &gt;5L), 250L (open containers).</li> </ul>	
Approved Handler	: Not applicable.

### Section 16. Other information

The information contained in this data sheet is based on present scientific and technical knowledge. The purpose of this information is to draw attention to the health and safety aspects concerning the products supplied by PPG, and to recommend precautionary measures for the storage and handling of the products. No warranty or guarantee is given in respect of the properties of the products. No liability can be accepted for any failure to observe the precautionary measures described in this data sheet or for any misuse of the products.
