Routes of Exposure:

If in Eyes Rinse cautiously with water for 15 minutes. Remove contact lenses, if

present and easy to do. Continue rinsing. If eye irritation persists: Get

medical advice.

If on Skin Wash with plenty of soap and water. Take off contaminated clothing and

wash before re-use. If skin irritation occurs: get medical advice/attention.

If Swallowed DO NOT induce vomiting. Never give anything to the mouth of an

unconscious person. If vomiting occurs, place victim face downwards, with the head turned to the side and lower than the hips to prevent vomit

entering the lungs. Immediately call a POISON CENTER or

doctor/physician.

If Inhaled Remove person to fresh air. Remove contaminated clothing and loosen

remaining clothing. Allow person to assume most comfortable position and keep warm. Keep at rest until fully recovered. Get medical advice if

breathing becomes difficult.

Section 5. **Fire Fighting Measures**

Hazard Type	Combustible Liquid
Hazards from combustion products	Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.
Suitable Extinguishing media	Alcohol-resistant foam, CO ₂ , powders, water spray. Do not use water jet.
Precautions for firefighters and special protective clothing	Fire will produce dense black smoke. Avoid breathing vapour or mist. Appropriate breathing apparatus may be required. Cool closed containers exposed to fire with water. Do not release runoff from fire to sewers or waterways.
HAZCHEM CODE	3Y

Section 6. **Accidental Release Measures**

Wear protective equipment as detailed in Section 8. Clear area of any unprotected personnel.

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Do not allow to enter drains or watercourses. Preferably clean with a detergent. Avoid using solvents. If the product enters drains or sewers, immediately contact the local water company; in the case of contamination of streams, rivers or lakes, the relevant environment agency.

Section 7. **Handling and Storage**

Precautions for Handling:

- Read label before use.
- Read safety data sheet before use
- Keep away from heat & hot surfaces. No smoking.
- Wash hands thoroughly after handling.
- Avoid release to the environment.
- Wear protective gloves/protective clothing/eye protection/face protection*.

Precautions for Storage:

- Store away from incompatible materials listed in Section 10.
- Store locked up.
- Store in a well-ventilated place. Keep cool.

WORKPLACE EXPOSURE STANDARDS (provided for guidance only)

Substance	Cas No	TWA ppm mg/m ³	STEL ppm mg/m ³
Distillates (petroleum), Hydrotreated light	64742-47-8	200 mg/m ³ 8 hours	
Naphtha (petroleum),

Workplace Exposure Standard – Time Weighted Average (WES-TWA). The time-weighted average exposure standard designed to protect the worker from the effects of long-term exposure. Workplace Exposure Standard – Short-Term Exposure Limit (WESSTEL). The 15-minute average exposure standard. Applies to any 15- Minute period in the working day and is designed to protect the worker against adverse effects of irritation, chronic or irreversible tissue change, or narcosis that may increase the likelihood of accidents. The WES-STEL is not an alternative to the WES-TWA; both the short-term and time-weighted average exposures apply. Workplace Exposure Standards and Biological Exposure Indices NOV 2019 11TH EDITION.

Engineering Controls

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the WEL, suitable respiratory protection must be worn.

Personal Protection Equipment

Eyes	Use safety eyewear designed to protect against splash of liquids.
Hands and	For prolonged or repeated handling, use the following type of gloves:
Skin	Recommended: nitrile rubber, foil, fluor rubber
	Not recommended: neoprene, butyl rubber, PVC
	Barrier creams may help to protect the exposed areas of the skin but should
	not be applied once exposure has occurred. Personnel should wear antistatic
	clothing made of natural fibres or of high
	temperature-resistant synthetic fibres.
Respiratory	If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.
	Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local
	exhaust ventilation, suitable respiratory protective equipment should be used.

Exposure to component solvent vapour concentrations in excess of the stated workplace exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. If splashed in the eyes, the liquid may cause irritation.
